Profile

I am a Computer Engineering student with an interest in mobile application development, software development, artificial intelligence, and cloud technologies. I have developed mobile applications using Java, Android Studio, and React Native, and worked on deep learning and Text-to-Speech (TTS) models using Python and PyTorch, gaining experience in data preprocessing, model training, and inference. I have hands-on experience in developing, deploying, and managing projects on Huawei Cloud infrastructure. Through university clubs, technology programs, and competitions such as Teknofest, I have strengthened my teamwork, problem-solving, and leadership skills. I am actively working on new projects to further enhance my technical expertise.

Professional Experience

11/2025 – Present
Volunteer

Huawei

Volunteer Cloud Trainer 

- The Huawei Cloud Volunteer Trainer Program is a community-driven initiative focused on delivering cloud technology education and hands-on learning experiences.
- I deliver trainings on cloud architectures and platform usage, explaining core Huawei Cloud services such as ECS, OBS, RDS, IAM, and VPC.
- I conduct hands-on laboratory sessions on Huawei KooLabs to reinforce practical cloud skills and support participants in preparing for cloud certification pathways.

2023 – Present
HSD Dumlupınar

Huawei Student Developers

Core Team Member - Technical Unit Coordinator

Huawei Student Developers (HSD) is a university program that enables students to lead campus communities and organize technology-focused initiatives.

- Previously served as an Education Coordinator, organizing and moderating speaker sessions with students and industry professionals.
- Currently serving as the Technical Unit Coordinator, leading and coordinating technical project development for club initiatives and technology competitions, with responsibilities including project planning, technical execution, and team collaboration.

08/2025 – 09/2025
Remote

Microsoft

AI Engineer Intern 

- Developed a stock price prediction project using PyTorch as part of the Microsoft AI Summer Internship Program.
- Built and trained LSTM- and GRU-based deep learning models, comparing their performance using historical financial data.
- Performed data preprocessing using Pandas, NumPy, and scikit-learn, and visualized results with Matplotlib.

10/2024 – 06/2025
Kütahya

Artun UAV Team

Software Team Leader 

- Led a 6-member software team developing autonomous flight and mission-control systems for the Artun UAV Team's participation in the International Unmanned Aerial Vehicle Competition (Fixed-Wing Category) within TEKNOFEST.
- Coordinated task assignments and module integration, including navigation, mission animation, and communication systems, while strengthening my leadership, problem-solving, and embedded software development skills.

09/2024 – 12/2024

Remote

Yetkin Gençler

Trainee 

- YetGen is a 12-week educational program focused on essential skills such as effective presentation, teamwork, career planning, Excel modeling, social innovation, and digital literacy.
- Completed various assignments and participated in the GirişGen Ideathon, developing a project idea addressing a global issue aligned with the UN Sustainable Development Goals (SDGs).
- This experience strengthened my collaboration, creative thinking, and communication skills through hands-on learning and team-based challenges.

Education

2022 – Present

Bachelor's degree

Kütahya Dumlupınar University

- Bachelor of Science in Computer Engineering (GPA: 3.01 / 4.00)
- Completed one year of English preparatory education (B1)

Certificates

HCCDA-Tech Essentials

Huawei Cloud Türkiye

Yetkin Gençler Sertifikası 2024

Yetkin Gençler

HCCDA - AI

Huawei Cloud Türkiye

Yapay Zeka İçin Python Programlama

BTK Akademi

Java101, 201, 301

Turkcell Geleceği Yazarlar

LLM Jetpack Program

C# ile Algoritma ve Programlama 101, 201, 301

Turkcell Geleceği Yazarlar

Financial Literacy Level 1,2,3 Certificate

SPL

Awards

02/2026

2nd Place - Huawei Developer Competition (Europe)

- Presented an AI-powered accessibility solution on an international stage, competing with top teams across Europe.
- Demonstrated mobile application features and an accessibility-focused UX designed for visually impaired users.
- Delivered a technical demo and pitch to Huawei Europe jury members, achieving 2nd place among the finalists.

09/2025

1st Place - BTK & Huawei R&D Coding Marathon 2025

- Won First Place in the Coding Marathon organized by BTK and Huawei R&D.
- Contributed to an AI-powered accessibility project as part of a 3-member team, focusing on mobile application development, Text-to-Speech (TTS) features for visually impaired users, and Huawei Cloud integration.
- Participated in preparing and delivering the final project presentation to the jury.

05/2025

2nd Place - Hamilik Okulu Vakfı Girişimcilik Merkezi, Idea Marathon

- Awarded Second Place in the Idea Marathon organized by the Hamilik Okulu Vakfı Entrepreneurship Center as part of a four-member team.
- Developed a sustainability- and social-impact-focused, viable venture concept.

Skills

Technical Skills

- **Programming Languages:** Python, Java, Kotlin, JavaScript, C#
- **Databases & Query Languages:** SQL (PostgreSQL, MS SQL Server)
- **Mobile Technologies:** Android (Kotlin, Java), React Native
- **Web Technologies:** HTML, CSS, JavaScript
- **Frameworks & Tools:** PyTorch, FastAPI, DroneKit
- **Cloud Platforms:** Huawei Cloud
- **AI & ML Technologies:** Machine Learning (LSTM, GRU), Text-to-Speech (TTS), Model Deployment

Soft Skills

- Leadership & Initiative
- Cross-functional Team Collaboration
- Strategic & Analytical Thinking
- Problem Solving & Decision Making
- Adaptability in Dynamic Environments
- Ownership Mindset
- Continuous Learning & Growth

Projects

EduVisionAI – AI-Powered Accessibility Mobile Application

React Native, Python, Text-to-Speech, Huawei Cloud

- Contributed to the ongoing development of EduVisionAI, an AI-powered accessibility mobile application designed for visually impaired users.
- Built mobile UI components, user flows, and accessibility-oriented interfaces.
- Collaborated with AI and cloud teams to integrate Text-to-Speech (TTS) and AI-driven features into the mobile application.
- Took part in cross-functional teamwork, system integration, and the final project presentation to the jury.

FonIQ – AI-Powered Investment Fund Analysis Mobile Application

React Native, Expo, Node.js, Express, Google Gemini API

- Developed a mobile app for exploring and comparing TEFAS investment funds.
- Implemented fund filtering, comparison, and performance analysis features.
- Integrated Google Gemini API for AI-based fund insights and chat functionality.
- Built a backend service to handle data requests and resolve CORS limitations.

StockPriceAI – AI-Based Financial Market Analysis & Prediction

Python, PyTorch, LSTM, GRU, Pandas, NumPy, Streamlit

- Developed an AI-powered financial analysis and stock price prediction system covering BIST100, global markets, and cryptocurrencies.
- Implemented and compared LSTM- and GRU-based deep learning models through training and evaluation.
- Conducted time-series preprocessing, feature scaling, and performance analysis using MAE, MSE, RMSE, and loss curves.
- Visualized actual vs. predicted prices and market trends to improve interpretability.
- Built an interactive Streamlit interface to present analysis results and forecasts.

My Portfolio Website

HTML, CSS, JavaScript

- Designed and developed a personal portfolio website to showcase my projects, technical skills, and experience.
- Implemented a clean and responsive user interface with a focus on usability and visual consistency.
- Structured project sections to present detailed information about technologies used and development processes.
- Deployed the website and maintained it as a central platform for professional presentation.
